The **CARPORTMILANO** was created to meet the needs of customers who want to use a totally aluminum system with an innovative and attractive design. Thanks to its exceptional modularity and the minimum size of the foundations, the car port Milano can be installed both on parking lots and on the roofs of buildings.

- Made completely in anodized T6060 aluminum.
- Anchoring bases in galvanized steel.
- Possibility of color customization.
- Possibility to position the panels in landscape and portrait.
- Possibility of installing double-sided and frameless panels.

- Various layout possibilities for the available space.
- Technical support and calculation memories.
- Foundation configuration for each installation site.
- Quick and easy to install.
- Voted best design in the carport category in 2019.

Rugged Construction

Engineered steel and aluminum components ensure durability.

Flexible Architecture

Multiple foundation and array configuration options.

Design Assistant

Technical support team is dedicated to answering questions & addressing issues in real time.

25-Year Warranty

Products guaranteed to be free of impairing defects.
